NASCUS Cybersecurity Symposium, August 1-2, 2016

***Make plans to attend the NASCUS Cybersecurity Symposium
Chicago, IL***

Division of Credit Unions encourages credit unions to continue training on cybersecurity. Below is an excellent resource for your staff.

Credit unions are facing increasing threats to cybersecurity due to the volume and sophistication of cyber-attacks, and credit union operations, products, services, and regulations are growing in complexity. NASCUS encourages examiners, credit union cybersecurity professionals, and management to come together to discuss the critical issues facing the credit union information security system.

NASCUS's third annual cybersecurity symposium picks up where the first two very popular symposiums left-off. Hear and see cutting edge techniques, best practices, and procedures that can protect your organization from the latest cyber threats. About a dozen cybersecurity experts from across the nation will lead this year's 13 hours of educational presentations, discussions, demonstrations, and panel/groups.

The third annual Cybersecurity Symposium will be held on August 1st and August 2nd at the Westin Chicago River North. The hotel rate is \$229 per night (hotel room block code is NASCUS 2016), and the registration cost for the event is \$895 for NASCUS and CUNA members. For non-NASCUS and non-CUNA members the cost is \$1,095.

To register, please visit the following link:
